PROFILE

Yi Zhang is a PhD candidate at the Warwick Manufacturing Group (WMG), University of Warwick. Her research focuses on trustworthy AI, probabilistic robustness, safe generative models, and the robustness of vision-language foundation models. She previously worked on NLP algorithm development at Didi Global and ByteDance AI Lab, specializing in multilingual dialogue understanding and safety risk detection. She has published papers in ICCV 2025 and ECCV 2024 among others.

EDUCATIONAL BACKGROUND

The University of Warwick Warwick Manufacturing Group Engineering PhD	2023-10 to 2027-10
Beijing Language and Culture University Faculty of Information and Science Computer Science and Technology Master	2020-09 to 2023-07
Beijing Language and Culture University Faculty of Information and Science Computer Science and Technology Bachelor	2016-09 to 2020-07

AWARDS

The Warwick Star Award Postgraduate Research Student Award--Excellence in Innovation	2025-07
NVIDIA Academic Grant Program Academic Grant Program for Accelerating Innovation in Academia NVIDIA	2024-12

Publications

Adversarial Training for Probabilistic Robustness Y Zhang, Y Chen, Z Chen, W Ruan, X Huang, S Khastgir, X Zhao Proceedings of the IEEE/CVF International Conference on Computer Vision (ICCV 2025)	Published in 2025-07
ProTIP: Probabilistic Robustness Verification on Text-to-Image Diffusion Models against Stochastic Perturbation Y Zhang, Y Tang, W Ruan, X Huang, S Khastgir, P Jennings, X Zhao The 18th European Conference on Computer Vision (ECCV 2024)	Published in 2024-07
Augmenting Scenario Description Languages for Intelligence Testing of Automated Driving Systems Yun Tang, Antonio A Bruto Da Costa, Patrick Irvine, Tudor Dodoiu, Yi Zhang, Xingyu Zhao, Siddhartha Khastgir, Paul Jennings 2024 IEEE Intelligent Vehicles Symposium (IV 2024)	Published in 2024-06
Long-term memory for large language models through topic-based vector database Y Zhang, Z Yu, W Jiang, Y Shen, J Li 2023 International Conference on Asian Language Processing (IALP 2023)	Published in 2023-12
Distant Supervision For Chinese Semantic Role Labeling Y Zhang, G Wang, E Xun International Conference on Asian Language Processing (IALP 2022)	Published in 2022-12
Chinese Argument Identification Based on Bert Y Zhang, G Wang, Y Xiao, E Xun The 23rd Chinese Lexical Semantic Workshop (CLSW 2022)	Published in 2022-04

WORK EXPERIENCE

OpenDCO NLP Algorithm Engineer Focused on algorithm design for conversational AI and large language models. Developed and optimized intent understanding models, and built a virtual assistant system integrating LangChain and GPT-4. Contributed to multimodal LLM research through fine-tuning and performance optimization of large-scale model training.	2022-09 to 2023-06
ByteDance ByteDance AI-Lab: NLP Engineer Intern Conducted research on the Grammatical Error Correction (GEC) task. Developed methods incorporating syntactic features into automated speech evaluation, enabling more accurate assessment of sentence coherence and lexical diversity.	2022-04 to 2022-07
DiDiGlobalInc. Algorithm Engineer Intern Conducted the development of NLP algorithms for Didi International Security and Control Department, focusing on the analysis of driver-passenger dialogues and comments. Trained deep learning classification models and constructed multilingual NLP systems to identify linguistic features associated with potential safety risks.	2021-09 to 2022-03
